

Fix Auto Moncton, owned and operated by Justin McPherson. Justin purchased one of our first booths we installed in Atlantic Canada. Justin took more than a year deciding what style of booth he wanted to purchase. Justin was also concerned about the company that would install and service his booth. After taking a trip to the UniCure manufacturing facility in Nashville, TN, Justin decided that UniCure was the right choice for his shop.

Fix Auto Moncton has built a solid reputation in the accident repair industry, with their UniCure paint booth they are keeping pace with an ever-changing industry. Although the company has grown in size and joins an international network, it still maintains a family atmosphere and we are proud of our simplified claims process with your insurer, our quality commitment.
